 Sign in with a passkey Sign in

## 2 Select "Get Started"

The screenshot shows a security page with a shield icon at the top. The main heading is "Protect your account with 2-step verification". Below this, a paragraph explains that a password and verification code are required for unrecognized devices. Two options are listed: "Add an extra layer of security" and "Keep the bad people out". A yellow "Get started" button is at the bottom.

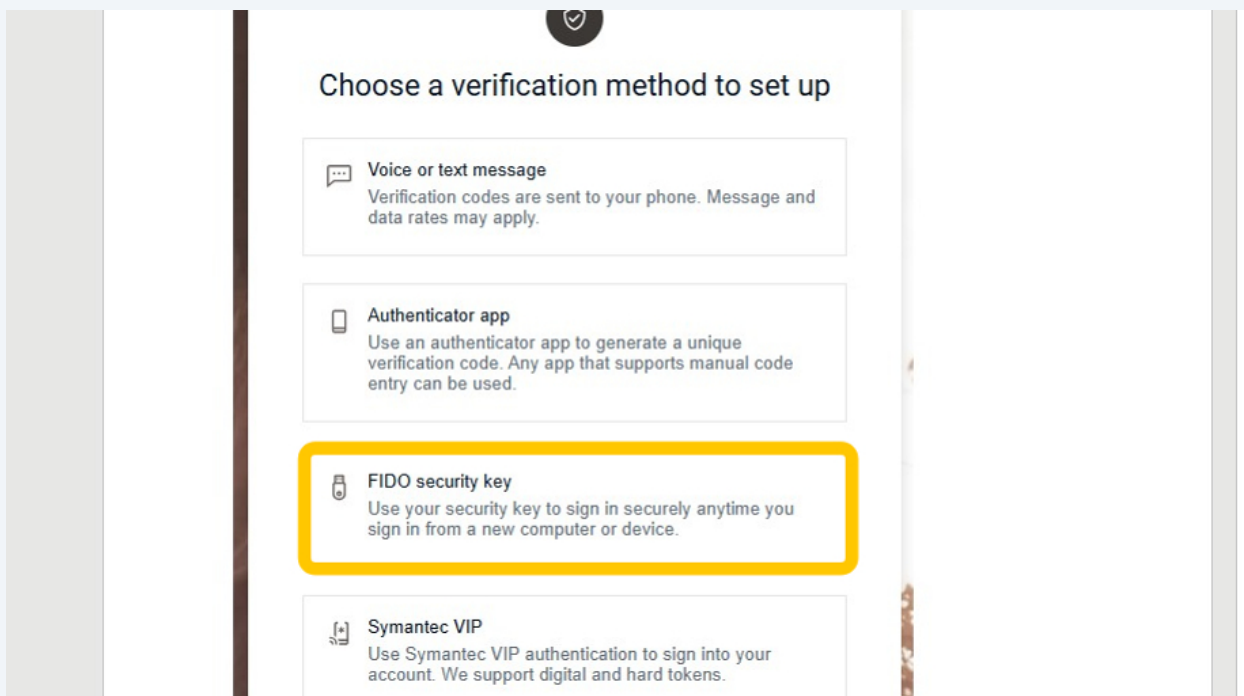

**Protect your account with 2-step verification**

Each time you sign into your account on an unrecognized device, we require your password and a verification code. Never share your code with anyone.

- Add an extra layer of security**  
Enter your password and a unique verification code.
- Keep the bad people out**  
Even if someone else gets your password, it won't be enough to sign into your account.

**Get started**

## 3 Select "FIDO Security Key"

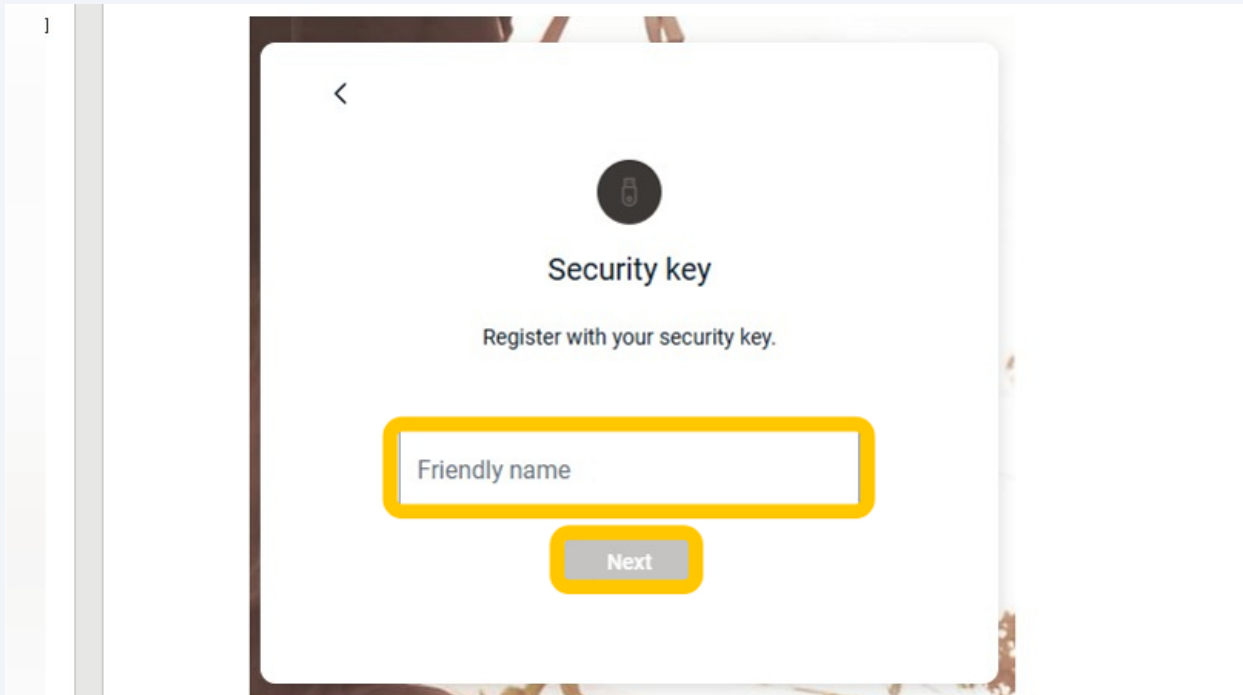

The screenshot shows a page with a shield icon at the top. The heading is "Choose a verification method to set up". There are four options listed in boxes: "Voice or text message", "Authenticator app", "FIDO security key" (highlighted with a yellow border), and "Symantec VIP".

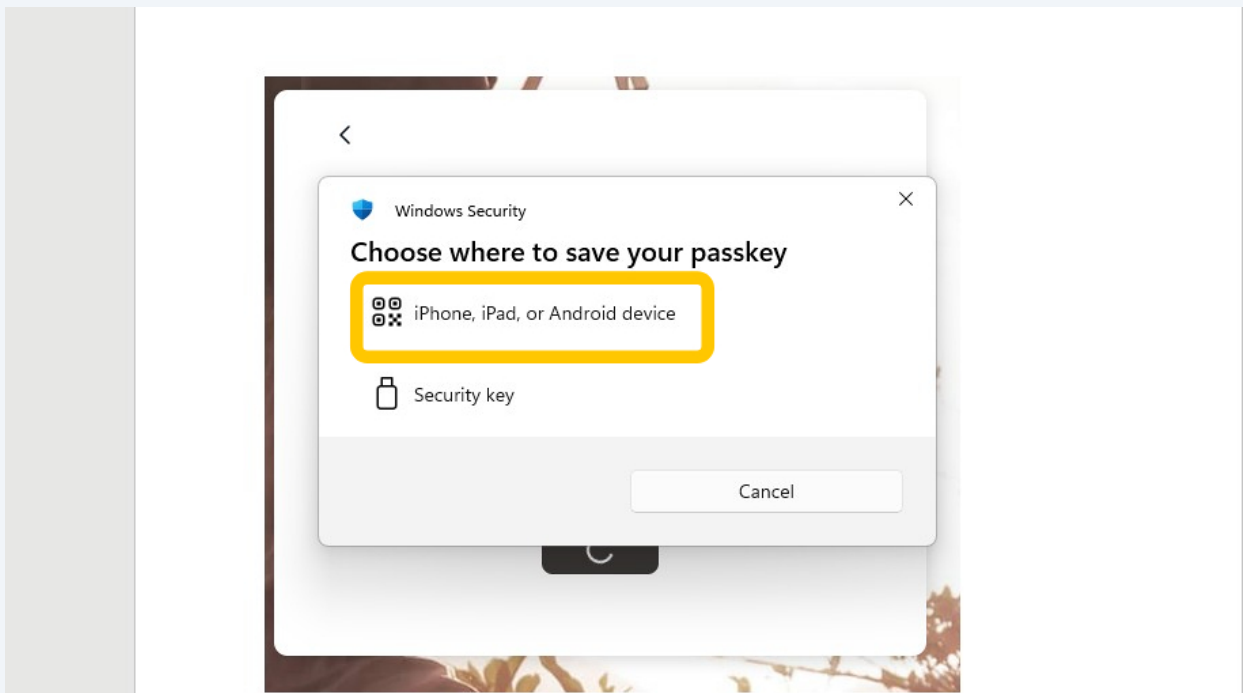

**Choose a verification method to set up**

- Voice or text message**  
Verification codes are sent to your phone. Message and data rates may apply.
- Authenticator app**  
Use an authenticator app to generate a unique verification code. Any app that supports manual code entry can be used.
- FIDO security key**  
Use your security key to sign in securely anytime you sign in from a new computer or device.
- Symantec VIP**  
Use Symantec VIP authentication to sign into your account. We support digital and hard tokens.

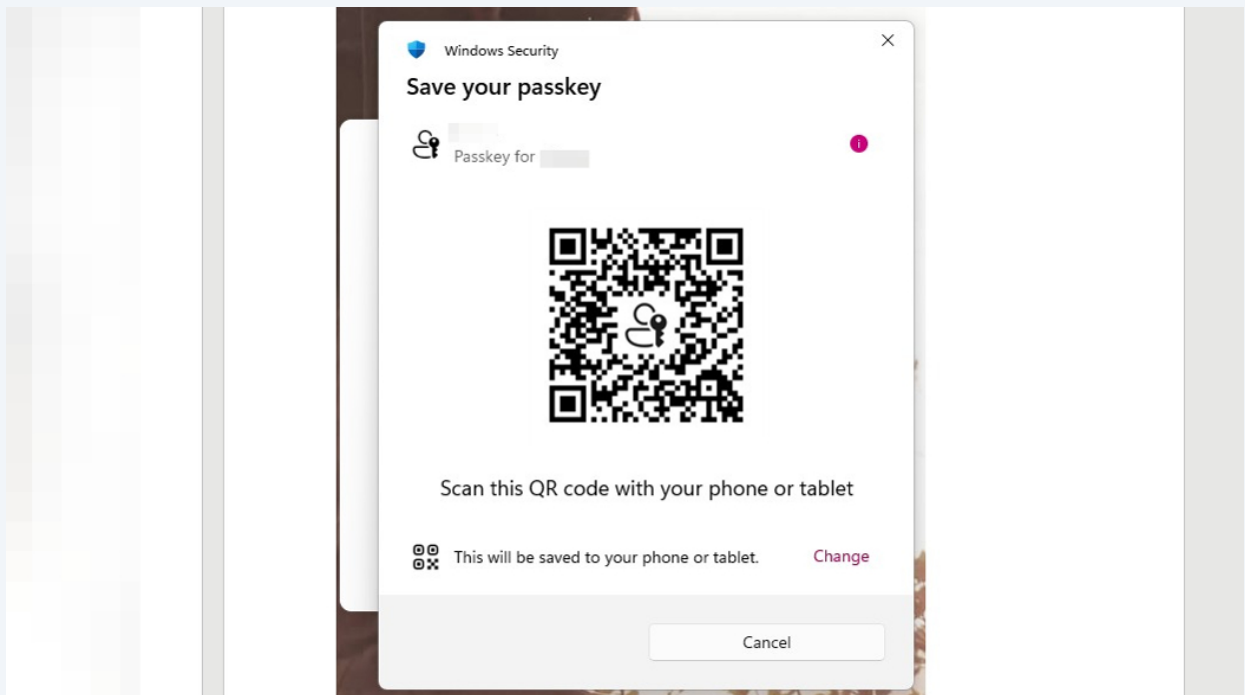

4 Put in a personal security key

5 Select "Iphone,Ipad, or Android Device"

6 Scan the QR code

7 After all the steps are followed you will be all set to use your new Security Key
